

BRIDGE OF HUMAN INNOVATION

Sculpture path lining the new bridge with themed rotating exhibits that relate to the concept of human innovation

"Sculptures" would be 3D printed in an exterior grade material and the generation of the source artwork files would be open to the public. Selected final art pieces will then be displayed for a given amount of time until the next exhibit.

The inaugural exhibit would be about bridge design and the Northern Avenue Bridge would be one of the featured sculptures.

DESIGN OF BRIDGE TO BE PROPOSED BY OTHERS

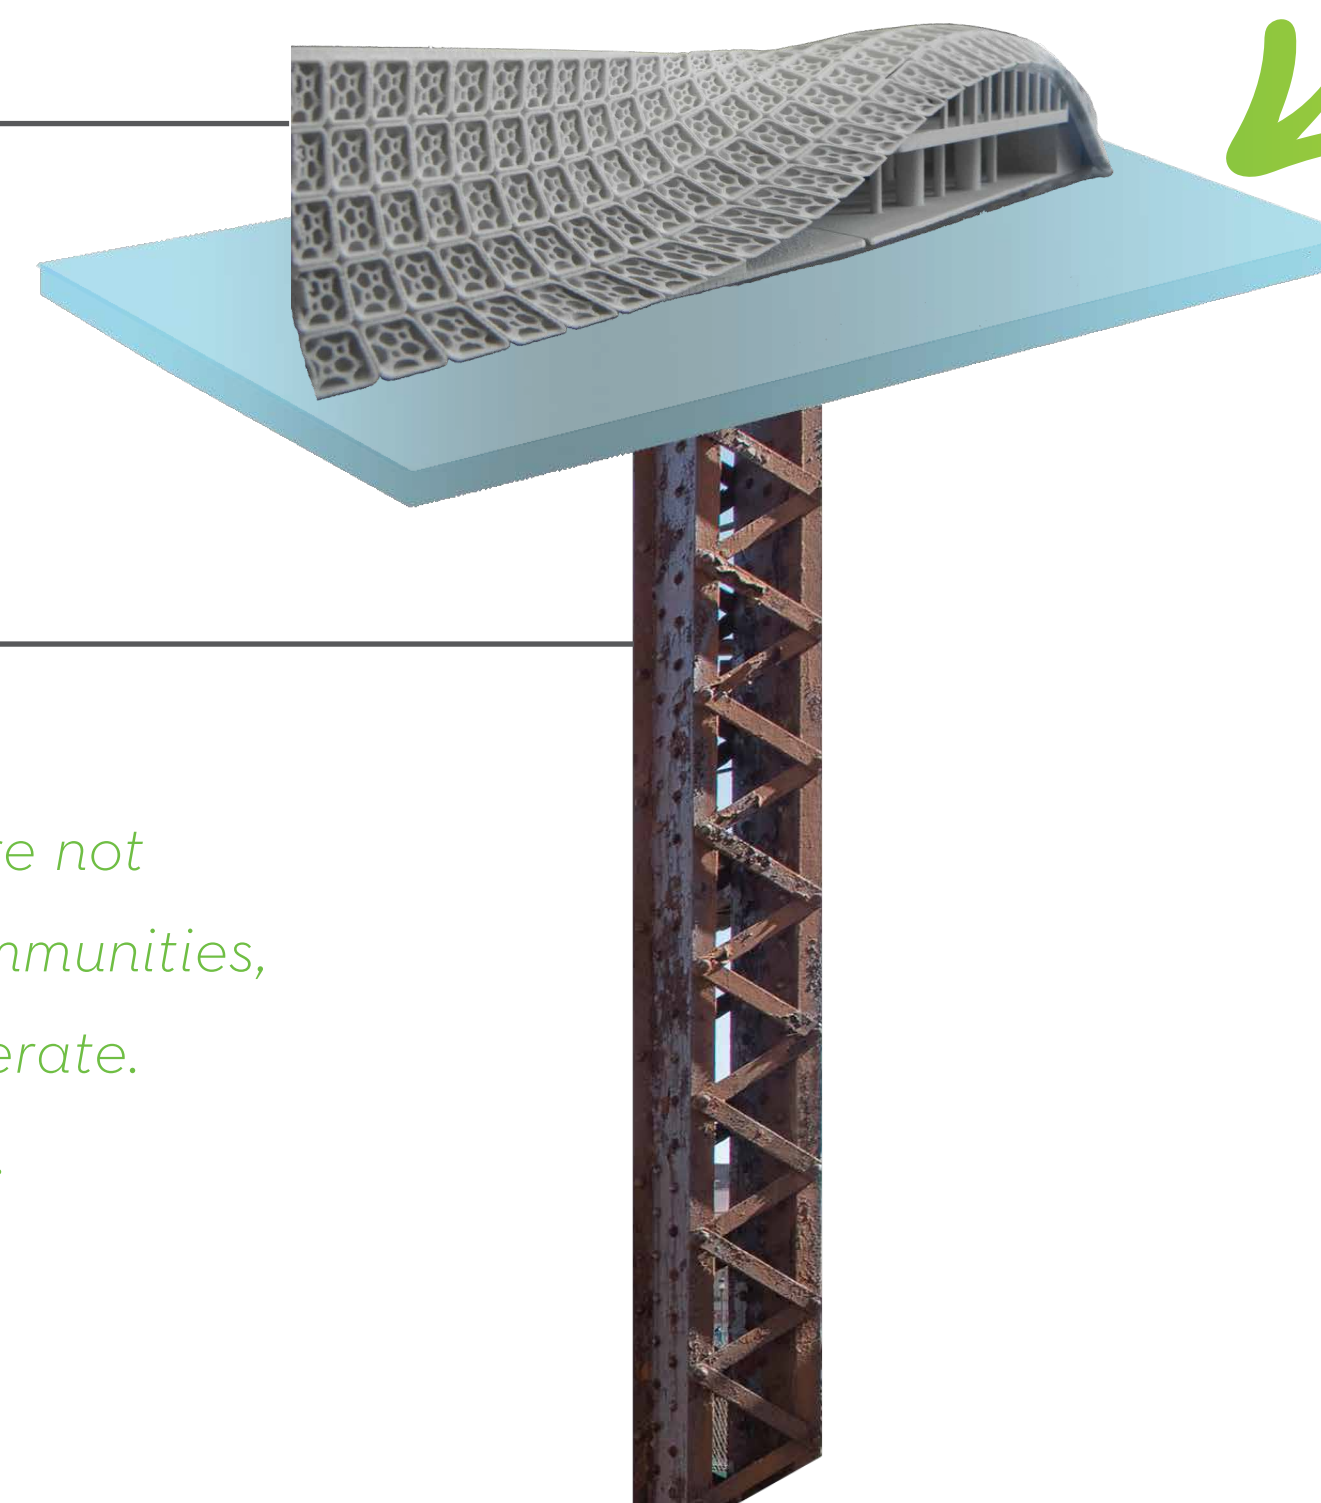

Sample display from inaugural exhibit:
"HUMAN INNOVATION: BRIDGES"

3D printed sculpture,
artwork generation open
to the public

Built-in platforms for
sculpture display created
with pieces from existing
Northern Avenue Bridge

Sample display from future exhibit:
"HUMAN INNOVATION: ARCHITECTURE"

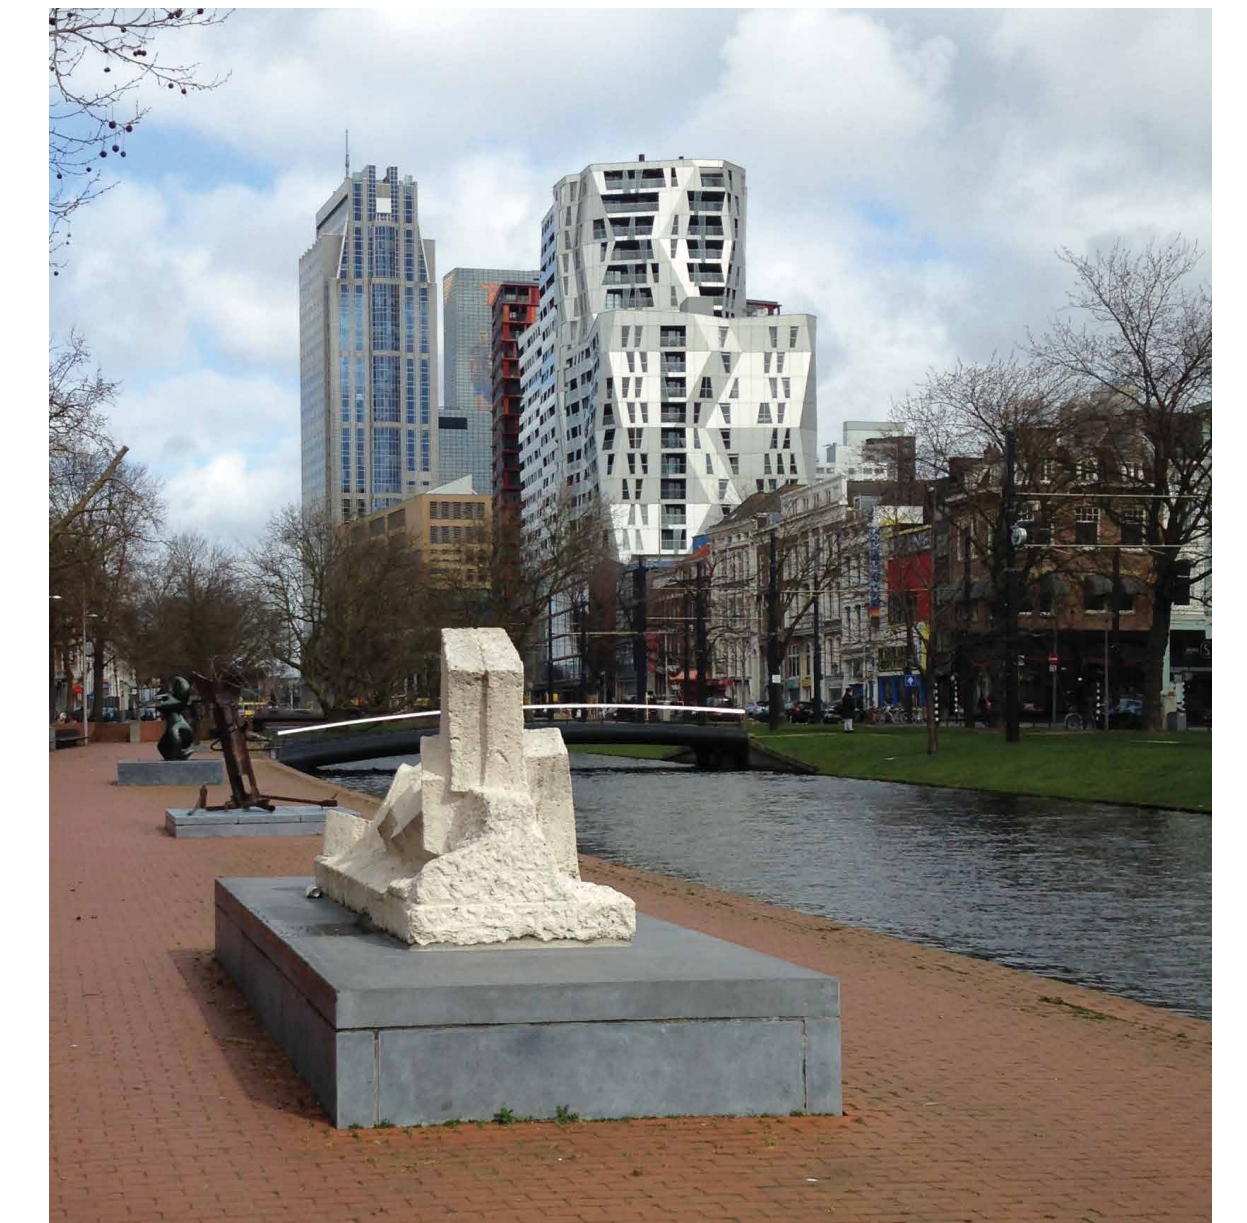

Once you have an innovation culture, even those who are not scientists or engineers—poets, actors, journalists—they, as communities, embrace the meaning of what it is to be scientifically literate.

They embrace the concept of an innovation culture.

Neil deGrasse Tyson
