

Blank Canvas

Art and Reflection Meet in the Middle

Inspiration ➤

Swing Drive Gear Sculpture

A dramatic helix represents the renewal of science & tech industries growing from the foundations of Boston's historically rich manufacturing & trade industry.

Full-Length Garden & Bikeway

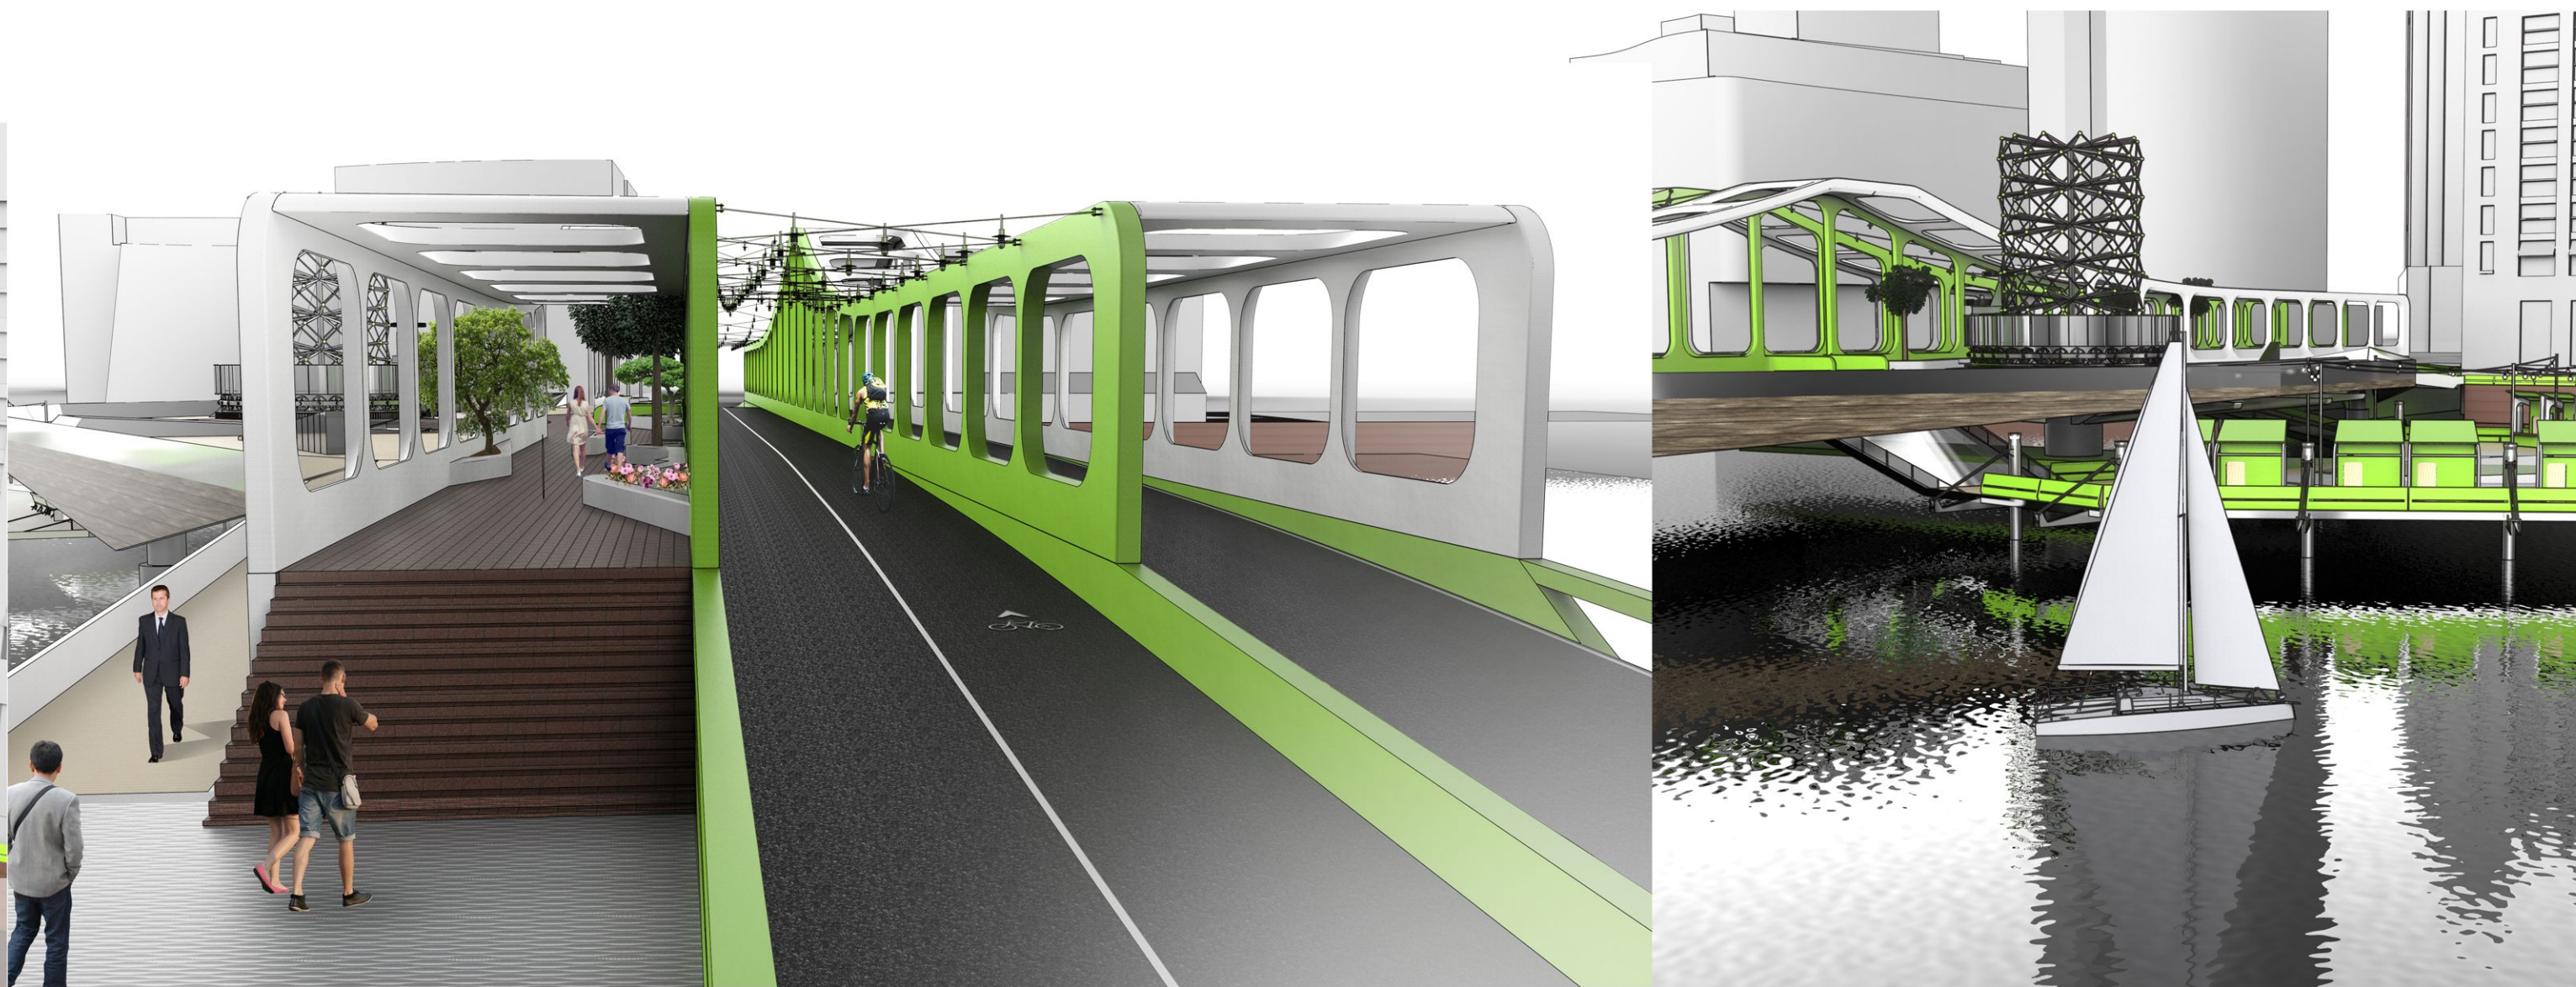

Fully protected from vehicular traffic, well lit at night.

The Lawn on P ("point")

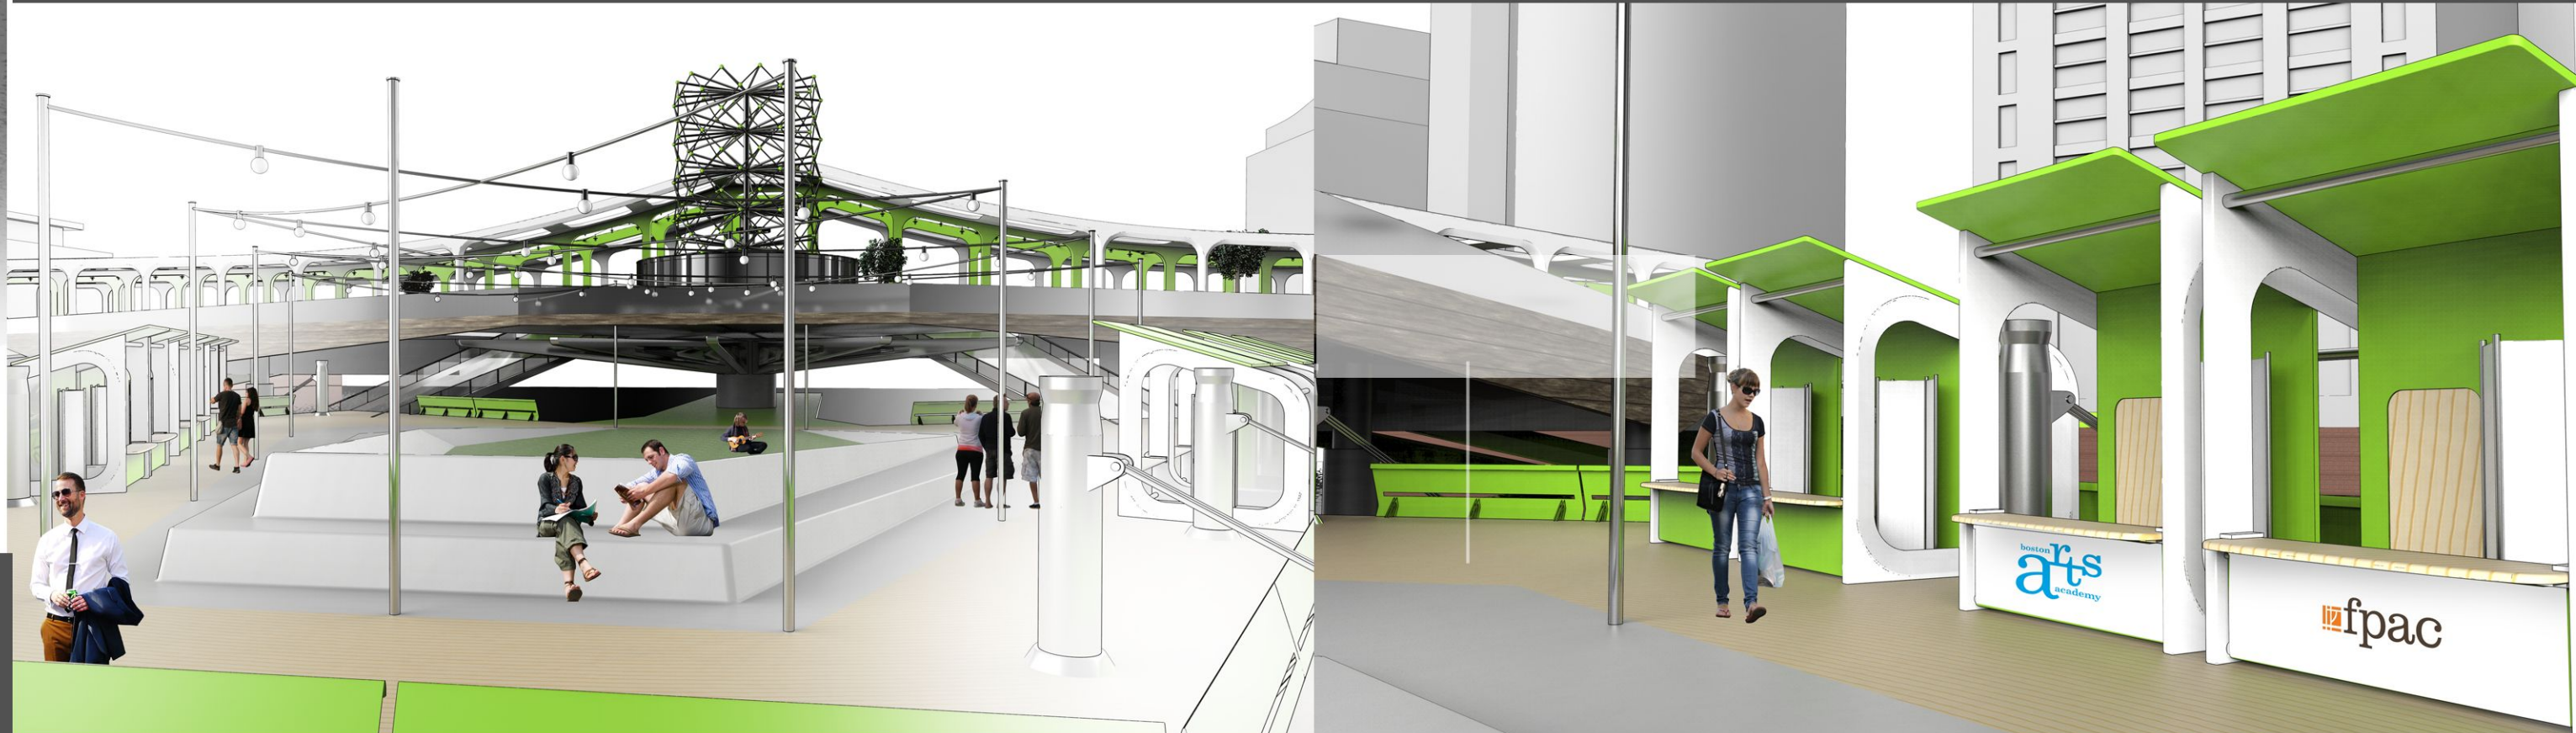

Centerpiece of relaxation and recreation.

Modular Artists Colony

Studio & retail pods allow artists to practice & sell their craft. Each tenant cycles through seasonally. Overall shape inspired by prow of a ship.

Vehicle traffic is limited to **inbound only**, to ease Moakley traffic and provide greater room for pedestrian and bike access.

The **Lawn On P** is a water-bound extension of the Greenway. It serves double duty as support for artists pods.

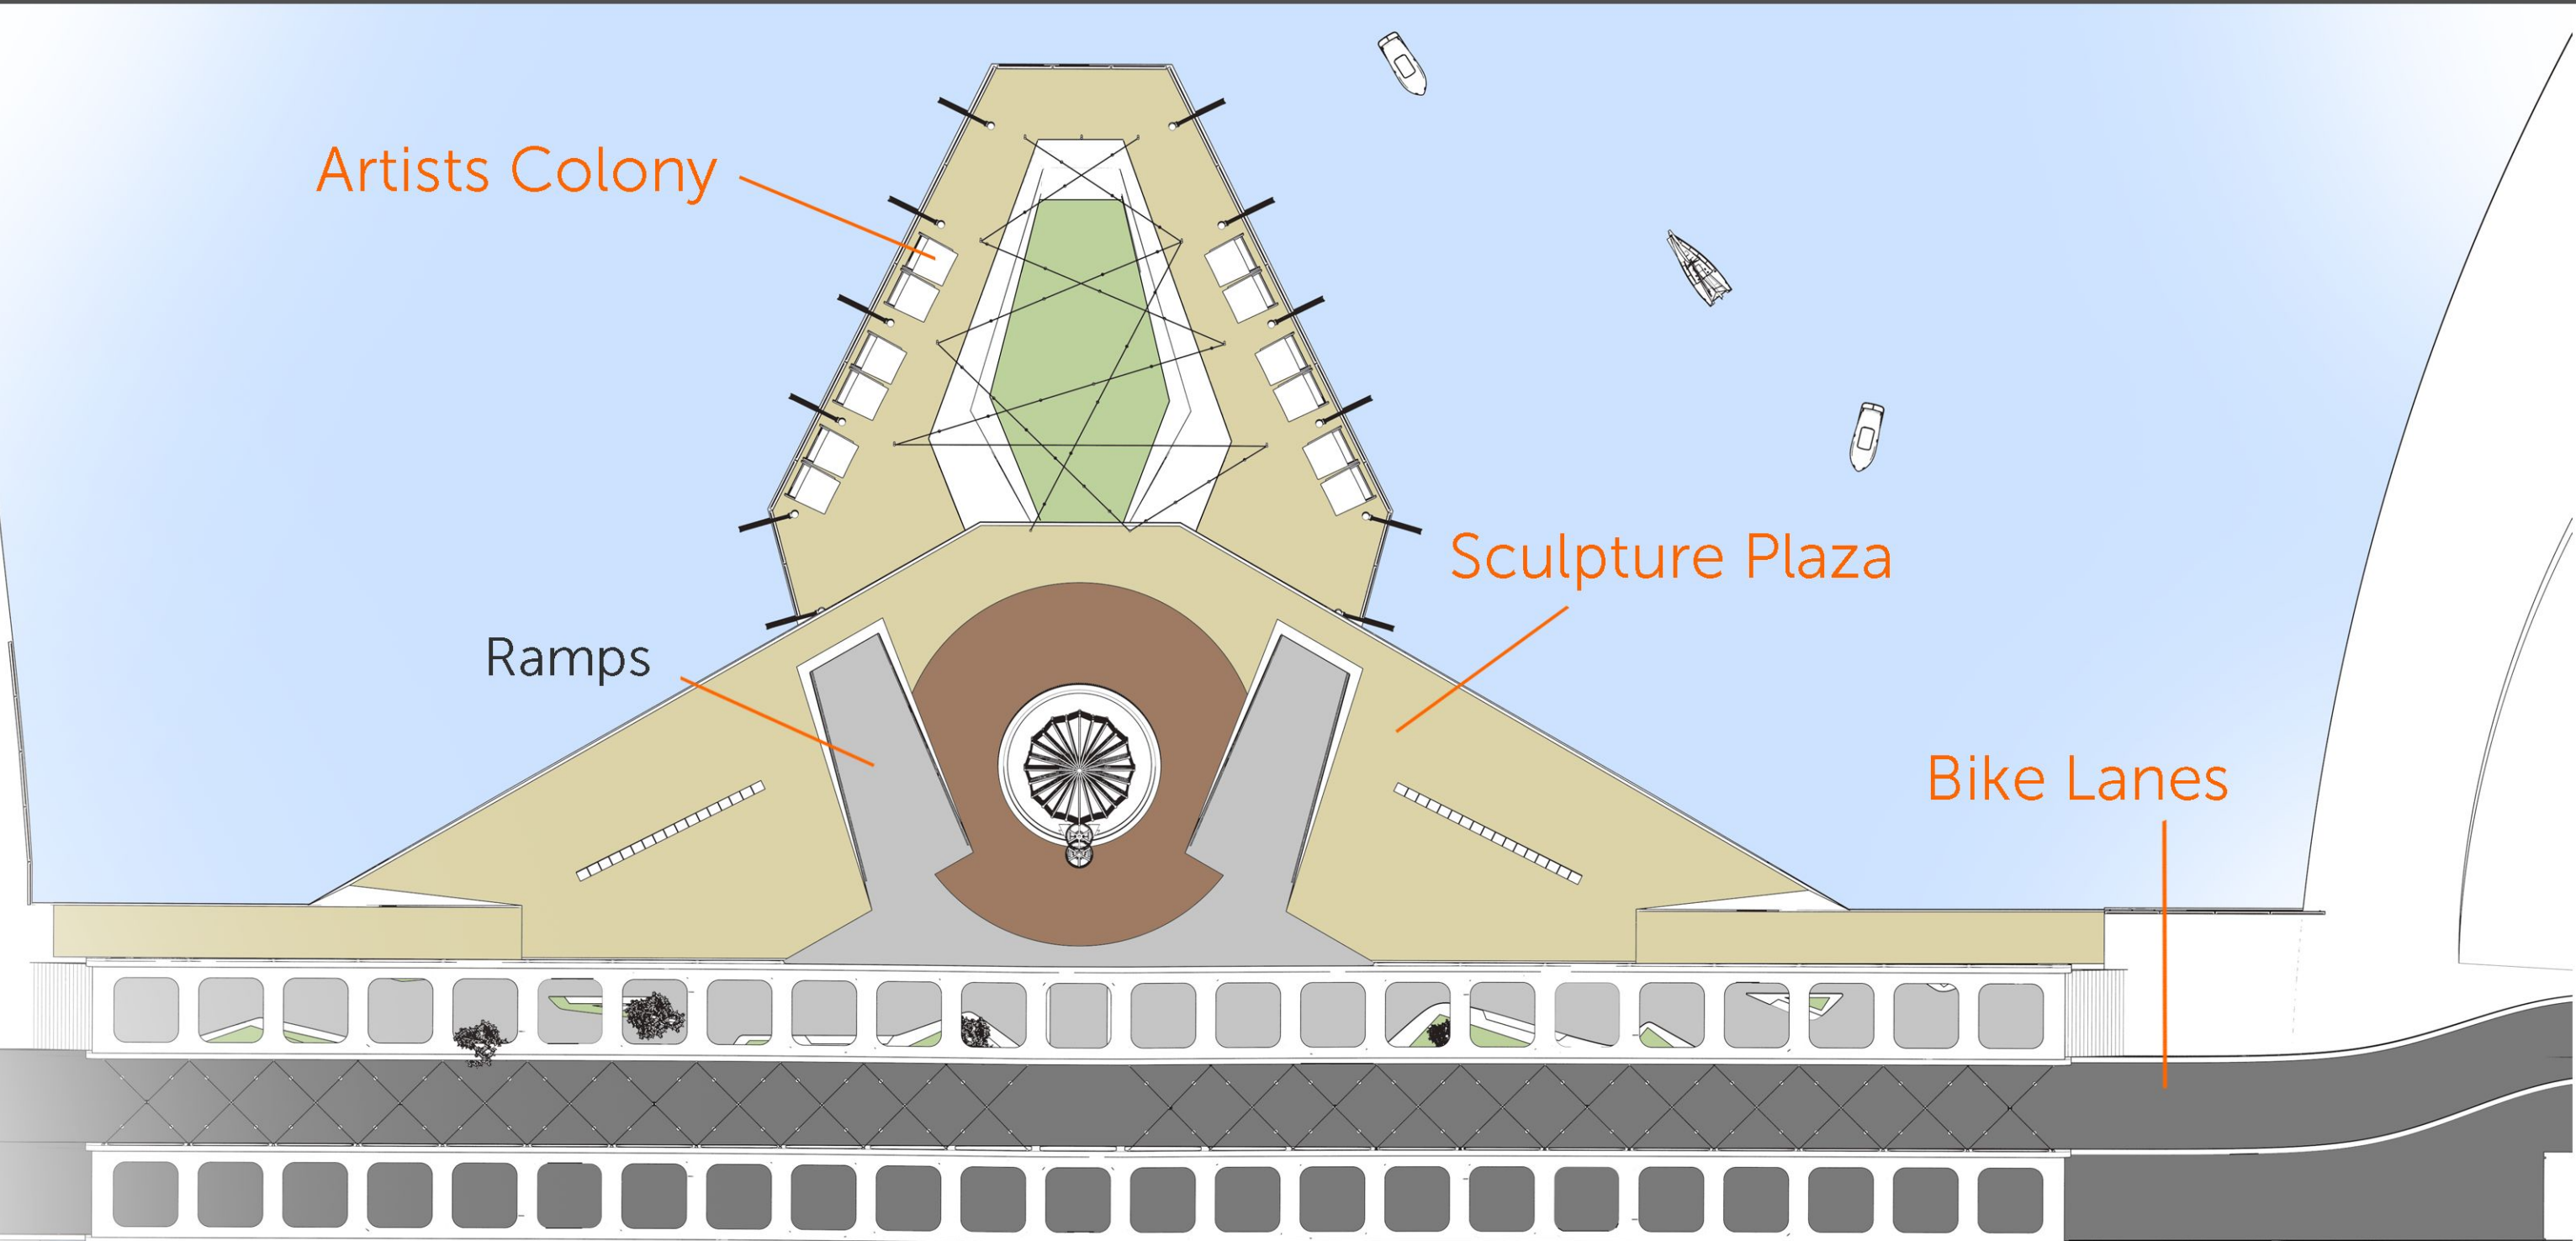

Artist Pods are two-zoned creative incubators. The outer facing side is a small, encloseable mini studio. The inner-facing side is a retail facade.

As evidenced by the **Fort Point Community Gallery**, **F P 3 Gallery**, **ICA**, **BSA**, and **FPAC** alone, the South Boston arts community is rapidly growing. This serves as a platform for artists to share, express, and sell their works in the public eye. Generously-sized walkways and bikeway provide bright, open, protected areas to roam.

Bridge Specs:

- steel & concrete superstructure
- reconfigurable garden path with collegiate-sponsored ecology horticulture, & botany plantings
- floating dock
