

Northern Avenue Bridge Proposal

1. Will be Boston's equivalent to Florence's Ponte Vecchio. Will connect downtown to Seaport and will be an instant Boston icon.
2. The two pyramids will be exposed in glass like the new Government Center T station.
3. Four restaurants in each pyramid will have see through glass balconies. Each pyramid will have a rooftop bar.
4. Rebuilding of bridge will be helped paid for by restaurant owners.
5. Public access to large dock/restaurant (rennovated existing building) that extends out from bridge. Tables/benches for sitting, lunch, etc.
6. Visible metal beams and form will be original beams from old bridge to showcase/preserve historic structure.
7. Width of bridge can vary if necessary to allow cars in center lanes, as well as foot traffic.
